 Chennai, Tamil Nadu

Professional Summary

Full Stack Developer focused on turning real-world problems into working products. Currently contributing to FuseCake, a SaaS platform for startup operations, building frontend and backend modules and features within a collaborative engineering team. Experienced with the MERN stack and familiar with TypeScript, Next.js, React Native, Flutter, and PostgreSQL. Also experienced in building RAG agents, AI workflows, and automation using n8n. I learn by building, take ownership of what I ship, and use AI as an engineering accelerator while keeping the underlying code and decisions my responsibility.

Technical Skills

Languages: JavaScript, HTML5, CSS3 **Frontend:** React.js **Backend:** Node.js, Express.js, REST APIs

Familiar: TypeScript, Next.js, Flutter, React Native, PostgreSQL **Tools:** Git, GitHub, Postman

AI & Automation: RAG, AI Agents, n8n, LLM Integration, Workflow Automation. **Database:** MongoDB

Experience

Web Developer Intern — Lettrblack

May 2026 – Present | React.js, Node.js, Express.js, MongoDB, Git/GitHub

- Contributing to **FuseCake**, a startup operating system for managing teams, productivity, workflows, and collaboration, by developing frontend and backend modules, features and REST API integrations.
- Collaborating with senior developers and the team using Git/GitHub to develop, debug, review, and deliver features while gaining hands-on experience with team-based SaaS product development.

Projects

Tracksup | TypeScript

[Live Demo](#) · [GitHub](#)

- Built a B2B supply chain management platform with inventory tracking, order management, procurement workflows, delivery tracking, and role-based dashboards for suppliers, retailers, and employees.

Nearby | Flutter

[Live Demo](#) · [GitHub](#)

- Built a location-based Flutter application for discovering nearby shops, products, offers, and reels. Implemented authentication, maps integration, REST API integration, saved items, and admin management

Project Management | MERN Stack

[Live Demo](#) · [GitHub](#)

- Developed a project management application using MongoDB, Express.js, React, and Node.js. Implemented task assignment, progress tracking, role-based access control, and secure authentication for team collaboration.

Education

The New College - Chennai

2023 – 2026

Bachelor of Computer Applications (BCA) **CGPA: 6.5/10**

Dhanish Matriculation Hr. Sec. School - Chennai

2021 – 2023

Higher Secondary Education (**Class XII**) - **81%**

Achievements & Certifications

- MongoDB Basics — MongoDB [**Certificate**]
- Hackathons — Participated in INNOHACK [**Certificates**] and TNC [**Certificates**]
- College Event — Organized and managed a personal stall [**Certificate**]
